

# Chicken Feet Skin Peeling Machine

This equipment offers easy operation, high output, and clean peeling, with a peeling rate of up to 98%. It is designed for efficient and hygienic removal of skin from chicken feet.

## Product Overview

### Efficient Poultry Processing Solution

This chicken feet peeling machine is engineered for the high-efficiency removal of skin from chicken feet, significantly reducing labor costs compared to manual processing. Constructed from durable, food-grade 304 stainless steel, it ensures hygienic operation and longevity in demanding poultry processing environments. With an impressive peeling rate of up to 98%, this equipment provides consistent, high-quality results suitable for small to medium-scale operations.

## Technical Specifications

### Model Specifications

Feature	Model SPT-600	Model SPT-300
Capacity	400-500 kg/hour	250-300 kg/hour
Motor Power	3 kW	1.5 kW
Voltage	380 V	380 V
Dimensions	950 x 850 x 980 mm	830 x 600 x 930 mm
Weight	110 kg	80 kg

## Construction & Design

Material	Stainless Steel 304
Key Features	Easy to operate, High output, Food-grade stainless steel, Hygienic design
