Product Overview

Industrial-grade chickpea peeling machine featuring an infeed hopper and compact design for food processing plants.

Industrial Wet Peeling Solution

This chickpea skin peeling machine is a professional-grade solution designed for the efficient removal of soaked skins from chickpeas, peanuts, almonds, and broad beans. Utilizing a specialized rubber ring separation method, it mimics manual peeling to ensure high efficiency with exceptionally low breakage rates. The equipment is ideal for food processors producing almond beverages, cakes, and fresh vegetable products where high-quality, skinless legumes are required.

Applicable Materials

Chickpeas, Peanuts, Almonds, Broad Beans, Soybeans

Performance Metrics

Robust construction with stainless steel components ensures hygiene and high throughput for commercial operations.

Key Performance Metrics

96 %

Peeling Rate

300 kg/h

Max Capacity

Core Features

- Low breakage rate (mimics human hand peeling)
- Automatic skin discharge and separation
- Small volume with high efficiency
- Pollution-free operation
- Adjustable settings for various nut sizes

Technical Specifications

Internal mechanism showing multiple rollers and adjustable settings for optimized peeling performance.

Model Specifications

Model	Capacity (kg/h)	Peeling Rate	Voltage	Power (kw)
GGT-8	150-160	96%	380V 50HZ	0.75
GGT-11	200-220	96%	380V 50HZ	1.5

Standard Voltage

380V 50HZ

Service & Support

After-Sales Commitment

The machine comes with a one-year guarantee and lifelong maintenance support. We provide free replacement parts for defects caused by design flaws within the warranty period. Technical support is available for all users to ensure long-term operational success.

Service Standards

24h Online Support • 12h Email Response • Lifelong Maintenance • Technical Support
