

Child Safety Power Strip with Outlet Covers

This power strip includes multiple outlets with yellow safety covers. It is designed to protect children by preventing them from accessing the electrical outlets.

Product Overview

Enhanced Safety Power Solution

This power strip is specifically engineered to prioritize safety in environments where children are present. Featuring integrated safety covers for each outlet, it provides an effective barrier against accidental contact or the insertion of foreign objects. Its robust design ensures reliable power distribution while maintaining a high standard of household or office security.
