

# Children's Beginner Bicycle with Training Wheels

This child's bicycle is designed for beginning riders. It features a sturdy frame, training wheels for added stability, and comfortable grips.

## Product Overview

### Designed for New Riders

The KSR 500 is a purpose-built children's bicycle engineered to support beginner riders as they develop their cycling skills. Featuring a robust steel frame and removable training wheels, it offers both durability and the stability needed for confidence-building. With adjustable components and protective fenders, this bicycle is designed to grow with the child while keeping them clean and comfortable during their first rides.
