

Children's Bicycle Pedal with Steel Axle

This bicycle pedal is designed for children's bikes, featuring a one-piece PP body. It is available with ball bearing or W/O balls bearing type and has a steel or boron axle.

Product Overview

Designed for Young Riders

This children's bicycle pedal is engineered with a durable one-piece PP body, ensuring reliability and safety for young cyclists. Featuring a flexible configuration with either ball bearings or a non-ball bearing design, it accommodates various bicycle assembly needs. The robust steel or boron axle provides essential strength for everyday use.
