

Children's Bicycle with Training Wheels and Push Bar

This children's bicycle includes training wheels and a parental push bar. It is designed with a high-back seat and a front basket.

Product Overview

Designed for Learning and Safety

This children's bicycle is specifically engineered to support young riders as they develop their cycling skills. Equipped with stabilizing training wheels and a parental push bar, it offers a secure and controlled learning experience. The durable metal frame and solid rubber tires ensure long-lasting performance, while the included front basket and decorative features add a touch of fun to every ride.
