

Children's Steel Frame Tricycle

This tricycle is designed for young children learning to ride. It features a sturdy steel frame for durability and stability.

Product Overview

Designed for Young Learners

The TC 1803D is a classic tricycle engineered specifically for young children beginning their cycling journey. Its robust steel frame construction ensures long-lasting durability and stability for outdoor use. Featuring a three-wheel design, it provides excellent balance to promote confidence while building motor skills.
