Overview

High-Performance Demolition Chisel Crown

The Chisel Crown is a professional-grade tool engineered specifically for efficient demolition and concrete removal tasks. Built with a robust steel construction, it is designed to withstand high-impact forces while maintaining exceptional wear resistance. Its unique crown design and wide blade ensure rapid material removal and precise control, making it an essential component for construction and renovation projects.

Technical Specifications

Shank Type

SDS-plus

Material

High-quality durable steel

Performance Features

Key Benefits

- High-impact force resistance
- Rapid material removal with wide blade
- Exceptional wear resistance
- Precise and controlled cutting
- Optimal power transfer

Applications

Primary Applications

Demolition, Concrete Removal, Material Shaping, Renovation, Construction

Compatibility

Tool Compatibility

Compatible with SDS-plus rotary hammers and standard chisel holders.
