

# Chrome-Plated Brass Hot and Cold Water Mixing Valve

This mixing valve is designed to blend hot and cold water to a desired temperature. Constructed from durable chrome-plated brass, it features a lever handle for easy temperature adjustment.

## Product Overview

### Professional Mixing Valve

This Chrome-Plated Brass Mixing Valve is designed for reliable hot and cold water temperature control. Engineered with a durable copper alloy body and a precision ceramic core, it ensures long-lasting performance and smooth operation. The unit features a versatile design with standard G1/2 threading and a 6L/M flow capacity, making it an ideal solution for various plumbing applications requiring consistent temperature mixing.

## Technical Specifications

<b>Category</b>	Mixing valve
<b>Model</b>	<b>H10</b>
<b>Connection Size</b>	G1/2
<b>Material</b>	Alloy copper
<b>Finishing</b>	Chrome-plating
<b>Core material</b>	Ceramic
<b>Core Ø</b>	ø35
<b>Handle</b>	Solid
<b>Flow Capacity(L/M)</b>	6L/M
<b>Function</b>	Mixed hot and cold water, throttling.
<b>Application</b>	Hot water terminal.

Detailed technical parameters for the H10 mixing valve, including connection size and material specifications.

<b>Construction Material</b>	Chrome-Plated Copper Alloy
<b>Ceramic Core Diameter</b>	35 mm
<b>Connection Thread</b>	G1/2
<b>Water Flow Rate</b>	6 L/M
<b>Net Weight</b>	529.6 g

## Features & Design

### Performance Highlights

**6 L/M**

Flow Capacity

**35 mm**

Core Diameter

<b>Key Features</b>	Chrome-Plated, Ceramic Core, High Temperature-Proof, Dual Inlet/Outlet
<b>Handle Material</b>	Zinc Alloy
