

Chrome-Plated Bread Slice Rack

This chrome-plated bread rack is designed to hold multiple slices of bread upright, preventing them from becoming soggy or sticking together. Its open design promotes air circulation, ensuring even toasting or cooling.

Product Overview

Professional Bread Cooling & Serving Rack

This chrome-plated bread rack is expertly designed to hold multiple slices of bread upright, preventing them from becoming soggy or sticking together. Featuring a sturdy wire construction with evenly spaced dividers, it accommodates various bread thicknesses while its open design promotes optimal air circulation. It is an ideal solution for commercial kitchens, bakeries, and catering services requiring efficient cooling or organized presentation.
