

Chrome Vanadium Steel Screwdriver with Ergonomic Handle

This screwdriver features a durable chrome vanadium steel shaft for enhanced strength and corrosion resistance. Its ergonomically designed blue handle ensures a comfortable grip and efficient torque transfer.

Product Overview

Professional Grade Precision

This screwdriver is engineered for high-performance fastening applications, featuring a premium chrome vanadium steel shaft that ensures exceptional durability and resistance to corrosion. The tool is designed with an ergonomic handle to provide a comfortable, non-slip grip that facilitates maximum torque transfer during use. Built to withstand demanding work environments, it is an essential component for both professional technicians and industrial maintenance toolkits.

Technical Specifications

Material	Chrome Vanadium Steel
Model Number	NL-506

Features

Key Features

- Ergonomic handle design
- High torque transfer efficiency
- Corrosion-resistant shaft
- Enhanced durability

Compliance & Quality

Quality Standards	Chrome Vanadium, Ergonomic, Industrial Grade
