

# Circular Electrical Component Cover

This circular cover protects internal electrical components. It features a brushed metal exterior and is designed for applications needing a sealed enclosure.

## Product Overview

### Industrial Protection Solution

This circular electrical component cover is engineered to provide robust protection for sensitive internal machinery parts. Featuring a durable brushed metal exterior, it is specifically designed to shield electrical components from harsh environmental factors. The unit includes an integrated water inlet/outlet structure, making it suitable for demanding industrial applications requiring a sealed and secure enclosure.

## Technical Specifications

### Material Finish

Brushed Metal

### Integrated Features

- Water inlet/outlet ports
- Internal component housing
- Sealed enclosure design

### Model Number

D-100-15

### Form Factor

Circular

### Application

Industrial Machinery, Electrical Enclosure, Environmental Protection
