

# Circular Fluorescent Lamp

Circular fluorescent lamps provide energy-efficient lighting for various applications. The lamps offer a soft, diffused light suitable for general illumination and are available in different wattages such as 22W, 32W, and 40W.

## Product Overview

### Versatile Circular Lighting

These circular fluorescent lamps offer an energy-efficient solution for diverse lighting requirements. Designed for uniform light distribution, they provide a soft, diffused illumination that minimizes shadows and improves visual comfort. The circular form factor makes them an excellent choice for various indoor applications, including residential, commercial, and industrial settings.

## Technical Specifications

### Available Wattages

- 22
- 32
- 40

### Light Quality

Soft Diffusion, Uniform Distribution, Shadow Reduction

## Application

### Recommended Settings

Residential • Commercial • Industrial
