

Circular Fluorescent Tube Lamp

This circular fluorescent tube lamp is designed for uniform lighting. It is typically used in ceiling fixtures or specialized lighting applications where diffuse, even light distribution is required.

Product Overview

Uniform Lighting Solution

This circular fluorescent tube lamp is engineered for applications requiring diffuse, even light distribution. Designed with a distinct circular geometry, it features a central mounting base and support struts to ensure structural integrity and consistent positioning within ceiling fixtures. It is a versatile lighting component suitable for various specialized commercial and industrial environments.

Design & Construction

Mounting Features

- Central mounting base
- Integrated support struts

Form Factor

Circular tube

Technical Specifications

Compatibility Options

Variable Wattage • Multiple Color Temperatures

Power Source

Standard AC voltage

Common Applications

Ceiling Fixtures, Diffuse Lighting, Specialized Lighting
