

# Circular Hole Saw Set

This hole saw set is designed for creating circular cuts in materials. It includes toothed and diamond-coated saws in multiple sizes, and some feature pilot drill bits for accurate centering.

## Overview

### High-Performance Circular Hole Saw Set

This professional-grade circular hole saw set is engineered for precision drilling across a variety of demanding materials, including stainless steel, cast iron, and fiber-reinforced plastic (FRP). Designed for versatility and durability, the set offers low wear-off rates even when cutting through 5mm thick stainless steel sheets. Whether for plumbing, electrical control box installation, or industrial manufacturing, these hole saws provide the reliability and clean cutting performance required for heavy-duty applications.

## Technical Specifications

### Available Set Configurations

- 5pcs/set: 16, 20, 25, 30, 32mm
- 8pcs/set: 16, 18, 20, 22, 25, 30, 32, 40mm
- 13pcs/set: 19, 22, 25, 30, 32, 35, 38, 45, 51, 55, 65, 70, 75mm

Diameter Range	15mm - 100mm
----------------	--------------

Max Cutting Thickness (Stainless Steel)	5 mm
---	------

## Compatibility & Usage

### Compatible Materials

Stainless Steel • Cast Iron • Iron Plates • FRP (Fiber-Reinforced Plastic)

Compatible Machinery	Electrical Drills, Drilling Presses, Magnetic Drill Presses
----------------------	---

## Applications

### Common Industry Applications

Sector	Specific Use Case
Construction	Stainless steel doors, windows, and railings
Manufacturing	Aluminum doors and windows
Utilities	Plumbing and HVAC works
Electrical	Opening electrical control boxes
Marine	Yacht and ship building
