

Circular LED Wall Light with Dual Emission

This LED wall light features a sleek, modern design with a circular body and dual light emission. It provides both upward and downward illumination, creating a visually appealing lighting effect.

Product Overview

Dual Emission Circular Wall Light

This modern circular LED wall light is designed to provide dual-directional illumination, casting light both upwards and downwards for a sophisticated aesthetic effect. Engineered with energy-efficient LED technology, it offers a reliable lighting solution for various interior spaces. With its compact dimensions and robust IP65 rating, this fixture combines sleek design with practical durability for professional applications.
