

Circular Loudspeaker Driver

This loudspeaker driver features a circular cone with a central dust cap and a rigid frame with mounting points. It is designed for audio reproduction in various applications, including home audio systems, car audio, or professional sound reinforcement.

Overview

Professional Audio Component

This circular loudspeaker driver is engineered for high-fidelity audio reproduction across a variety of applications, ranging from home audio systems to professional sound reinforcement. Featuring a robust, rigid frame design and a precision-engineered cone with a central dust cap, it ensures consistent performance and durability. Its versatile mounting points allow for seamless integration into custom enclosures and existing audio setups.

Physical Characteristics

Driver Shape	Circular
Design Features	Central Dust Cap, Rigid Frame, Integrated Surround

Installation

Mounting Points	Yes
