

Circular Perforated Metal Grille

This circular grille is constructed from SPCC. It features a repeating pattern of evenly spaced circular perforations and is available in outer diameters ranging from 15mm to 700mm and thicknesses from 0.3mm to 1.5mm.

Product Overview

High-Performance Circular Perforated Grille

This circular perforated metal grille is engineered for versatility in industrial and commercial applications, ranging from audio equipment to ventilation systems. Constructed from durable SPCC iron, it features a precision-stamped hexagonal perforation pattern that balances structural integrity with optimal airflow or sound transmission. With a wide range of available dimensions and professional surface finishes, this component is designed to meet rigorous B2B standards for performance and compliance.

Technical Specifications

Outer Diameter Range

15 mm

Min Diameter

700 mm

Max Diameter

Thickness Range

0.3 mm

Min Thickness

1.5 mm

Max Thickness

Material

SPCC Iron

Compliance and Finish

Compliance

RoHS 2.0 Compliant

Surface Treatment Options

Plating (Cr3+), ED Coating Black, Powder Coating Black
