

Circular Physical Measuring Meter

This is a circular measuring meter used for precise physical measurements. It is made of durable material and designed for integration into a larger instrument or apparatus.

Product Overview

Precision Circular Measuring Meter

The Circular Physical Measuring Meter is a specialized component engineered for high-accuracy physical measurements. Designed for seamless integration into larger industrial instruments and apparatus, this device features a robust construction with a central mounting hole for stable installation. Its distinctive blue coating is optimized for enhanced visibility and performance in demanding operational environments.

Design Specifications

Mounting Configuration	Central mounting hole
Key Features	Circular Geometry, Radial Slots, Integrated Indicators

Physical Properties

Surface Coating	Blue
Material Type	Durable Industrial Grade
