# Circular Road Sign Boards

These circular road signs effectively communicate important regulatory information. Designed for use in highway engineering, they ensure high visibility of speed limits, height restrictions, weight limits, and parking prohibitions.

## Product Overview

### Professional Traffic Control Solutions

These high-visibility circular road sign boards are engineered for durability in demanding highway environments. Available in a wide array of shapes and custom sizes, each unit is constructed from premium aluminum panels and high-grade reflective sheeting. Designed for longevity, these signs ensure clear communication of critical traffic regulations for distances up to 800 meters.

## Technical Specifications

**Available Thickness**

- 1
- 1.5
- 2
- 3

**Visibility Range**

**800 m**
Maximum Distance

| | |
|---|---|
| Panel Material | Aluminum, Steel |
| Service Life | 10 years |

## Design and Customization

**Reflective Sheeting Grades**

- Diamond Grade
- High Intensity Grade (HIP)
- Engineering Grade (EGP)
- Economic Grade

**Standard Colors**

White • Red • Yellow • Blue • Green • Black

| | |
|---|---|
| **Shape Options** | Circular, Triangle, Square, Rectangle, Octagon |
