

Circular Saw Blades and Abrasive Cutting Wheels

Circular saw blades and abrasive cutting wheels are designed for power tools. The saw blades cut wood, while the cutting wheels handle metal and hard materials.

Product Overview

Professional Cutting Solutions

This high-performance collection features professional-grade circular saw blades and abrasive cutting wheels tailored for diverse construction and fabrication needs. Designed for durability and precision, these accessories offer reliable performance in both woodworking and metalworking applications. Built to withstand high operational demands, they are essential tools for achieving efficient and accurate cuts in demanding environments.

Circular Saw Blades

Wood Cutting Blade Performance

184 mm

Diameter

24 T

Tooth Count

7000 RPM

Max Speed

15.875 mm

Arbor Size

Abrasive Cutting Wheels

Metal Cutting Wheel Performance

178 mm

Diameter

1.6 mm

Thickness

8500 RPM

Max Speed

22.2 mm

Arbor Size

Materials and Applications

Primary Applications

Woodworking, Metalworking, Construction, Fabrication

Material Composition

Alloy Steel
