

# Circular Saw for Wood and Materials

This circular saw is designed for cutting wood and other materials with precision. It features a high-speed motor, adjustable cutting depth, and durable construction for long-lasting performance.

## Product Overview

### Professional Circular Saw

This circular saw is engineered for precision and efficiency when cutting wood and various other materials. Equipped with a robust 1200W motor, it delivers consistent performance for demanding tasks. The adjustable design features a 0-45 degree tilt angle and variable cutting depth, making it a versatile tool for professional construction and woodworking projects.

## Power & Performance

### Rated Power

**1200 W**

Rated Power

**4500 RPM**

No-load Speed

### Electrical Requirements

230V 50Hz

## Cutting Capabilities

### Saw Blade Diameter

185 mm

### Maximum Cutting Depth

63 mm

### Tilt Angle Range

0-45 degrees

## Features

### Suitable Materials

Wood, General Materials
