

Circular Saw Woodworking Machine

This woodworking machine utilizes a circular saw blade for cutting wood. It features a sturdy table, powerful electric motor, blade guard, and rip fence for accurate and safe operation.

Product Overview

Professional Circular Saw Machine

This robust circular saw woodworking machine is engineered for high-performance cutting in professional shop environments. It features a high-torque electric motor coupled with a precise belt drive system to ensure smooth operation and consistent power delivery. Designed for versatility and safety, the unit includes an integrated blade guard and a sturdy rip fence to facilitate accurate, repeatable cuts on various wood materials.

Technical Specifications

Application

Professional Woodworking • Industrial Cutting

Drive Type

Belt-driven

Safety Equipment

Blade Guard, Rip Fence
