Product Overview

High-Performance Slitting Solution

These circular slitting knives are engineered specifically for the demanding requirements of the paper industry. Manufactured through a rigorous process involving high-quality steel forging, these blades deliver exceptional sharpness, toughness, and hardness. They are designed to ensure clean, efficient slitting performance, making them an ideal choice for converting, slitting, and rewinding processes in paper mills and facilities.

Technical Specifications

Primary Applications

- Paper Converting
- Slitting Paper Rolls
- Rewinding Processes
- Film and Foil Cutting

Material	High-quality steel
Key Properties	Sharp Cutting Edge, High Toughness, Strong Hardness, Wear Resistant

Compliance & Standards

Quality Certifications

ISO 9001 • CE • SGS • Qualicert
