

Circular Wire Brush for Surface Preparation

This circular wire brush is designed for surface preparation, cleaning, and deburring. It features a dense arrangement of twisted wire filaments for aggressive material removal.

Product Overview

Industrial Surface Preparation

This circular wire brush is engineered for professional surface preparation, cleaning, and deburring tasks. Featuring a dense arrangement of high-quality twisted wire filaments, it provides aggressive material removal performance for industrial applications. It is specifically designed to efficiently remove rust, scale, paint, and various contaminants from metal surfaces while maintaining long-lasting durability.

Technical Details

Brush Type	Circular Wire Brush
Filament Material	High-quality steel wire
Filament Configuration	Dense twisted wire

Compatibility & Use

Tool Compatibility

- Power tools
- Angle grinders

Primary Applications	Rust Removal, Scale Removal, Paint Stripping, Deburring, Surface Cleaning
Attachment Method	Central hub mount
