

# Circular Wire Fan Guard

This circular wire fan guard protects users from fan blades. It is constructed from durable metal and features concentric rings and radial supports.

## Product Overview

### Circular Wire Fan Guard

This circular wire fan guard is engineered to provide essential protection for both users and equipment by shielding exposed fan blades. Featuring a robust design with concentric rings and radial supports, it ensures structural integrity and safety during operation. The unit includes a central square opening, allowing for seamless and secure mounting onto standard fan configurations.

## Technical Specifications

### Design Features

- Concentric ring pattern
- Radial support struts
- Central square mounting aperture

### Safety Compliance

Fan Blade Protection • Industrial Safety

### Material

Durable Metal
