

City Bike Tire for Paved Surfaces

This city bike tire is designed for optimal performance and durability. It features a robust construction for enhanced puncture resistance and a tread pattern optimized for smooth rolling on paved surfaces.

Product Overview

Designed for Urban Commuting

This high-quality city tire is engineered for optimal performance and durability on paved surfaces. Its robust construction provides enhanced puncture resistance, while the specialized tread pattern ensures smooth rolling and excellent grip. Perfect for both daily urban commuting and recreational cycling, this tire offers a safe and comfortable riding experience in various weather conditions.

Technical Details

Product Code	D-207
Category	City tire series

Performance Features

Ideal Usage	Urban Commuting • Recreational Cycling
Key Benefits	Puncture Resistant, All-Weather Grip, Smooth Rolling, Urban Optimized
