

# City Bike Tire for Urban Cycling

This city bike tire is designed for urban cycling. It features a durable construction and a tread pattern optimized for grip and low rolling resistance on paved surfaces.

## Product Overview

### Designed for Urban Commuting

This high-quality city tire is specifically engineered for the demands of urban cycling. It features a durable construction paired with a tread pattern optimized for excellent grip and low rolling resistance on paved surfaces. Perfect for standard city bike rims, it offers a reliable and comfortable riding experience for daily commuters.

## Technical Specifications

Product Code	D-241
Category	City tire series
Tire Dimensions	57-559

## Performance Features

### Key Benefits

- Optimized for paved surfaces
- Low rolling resistance
- High durability construction
- Reliable grip
