

City Bus Chassis

This chassis is designed for high-end city buses, providing a solid foundation for bus manufacturers. It features a heavy-duty frame, advanced suspension system, and compatibility with various powertrain options.

Overview

High-End City Bus Chassis

This robust and durable chassis is engineered specifically to serve as a high-end foundation for modern city buses. Designed for urban transportation demands, it features a heavy-duty frame and an advanced suspension system to ensure passenger comfort and vehicle longevity. With compatibility for various powertrain options, this platform offers the flexibility and reliability required by bus manufacturers to meet stringent operational standards.

Engineering & Design

Primary Application

Urban Transportation • City Bus

Chassis Type

High-end City Bus Chassis

Key Features

Heavy-duty frame, Advanced suspension, Powertrain flexible
