Overview

Professional Mechanical Installation Set

The AZGJ and JLBS Clamp Holder and Ratchet set is a professional-grade tool kit specifically designed for the installation of mechanical lugs and connectors. This manual-operated system provides the necessary leverage and stability for secure electrical transmission and distribution tasks. With a robust design and a comprehensive range of socket sizes, it ensures efficient torque application and reliable performance in power line maintenance.

Core Components

Kit Contents

- 1x AZGJ-1050 Clamp Holder
- 1x JLBS-380 Ratchet
- 7x Sockets (9mm to 24mm)

Technical Specifications

Type	Length(mm)	Package Weight (kg)	Pack(pcs)
AZGJ-1050	420	2	1x4
JLBS-380	380		

Dimensional data and packaging information for the clamp holder and ratchet components.

Component Details

Type	Length	Unit
AZGJ-1050	420	mm
JLBS-380	380	mm

Clamp Holder Length	420 mm
Ratchet Length	380 mm
Included Socket Sizes	9mm, 10mm, 13mm, 17mm, 19mm, 22mm, 24mm

Application & Usage

Operation Mode

Manual Operated

Primary Application	Installation of mechanical lugs and connectors
Industry Use	Electric power transmission and distribution

Logistics

Package Weight	2 kg
Standard Packing	1x4 pieces
