

Clamp Lock for Rotary Cultivator

This clamp lock is a spare part for rotary cultivators. It is constructed from durable metal and features a threaded interior for secure attachment.

Product Overview

Durable metal construction designed for reliable performance in agricultural machinery.

High-Performance Clamp Lock

This clamp lock is a specialized spare part engineered for rotary cultivators, specifically designed for use in DH226E-PRO models. Constructed from durable, high-strength metal, it features a precision-threaded interior to ensure a secure and reliable attachment. Its robust design is built to withstand demanding agricultural environments, making it an essential component for effective soil preparation and machine maintenance.

Technical Specifications

Part Identification	1573-524
Material	Durable metal alloy
Compatible Equipment	DH226E-PRO, Rotary Cultivator

Compatibility

Comprehensive selection of high-quality components for optimal soil preparation.

Compatible Machinery Types

- Rotary tillers
- Paddy field stubble-bury beaters
- Foldable paddy field stubble-bury cultivators
- Paddy field ridge shapers

Quality Assurance

Quality Compliance

Industrial Grade • Precision Engineered • Rigid Quality Control
