

Clamshell Grab Bucket for Marine Use

This heavy-duty clamshell grab bucket is designed for shipbuilding and marine applications. It is constructed from robust steel and features a hydraulically operated closing mechanism for efficient loading and unloading.

Product Overview

Industrial Marine Clamshell Grab

This heavy-duty clamshell grab bucket is engineered specifically for demanding marine environments and shipbuilding applications. Featuring a robust steel construction, it is designed for the efficient handling of bulk materials like sand, gravel, and aggregates. The integrated hydraulic closing mechanism ensures high performance and reliability during loading and unloading operations in port or on vessels.

Technical Specifications

Material	Robust steel
Closing Mechanism	Hydraulic

Applications

Handling Capabilities

- Sand
- Gravel
- Aggregates

Suitable Industries	Shipbuilding, Marine, Port Operations
