

Class 1 Laser Sensor for Industrial Use

This laser sensor is designed for industrial applications requiring precision and reliability. It adheres to Class 1 laser safety standards, ensuring safe operation under normal use conditions.

Product Overview

Industrial Precision Laser Sensor

This Class 1 laser sensor is engineered for high-precision industrial applications where reliability and safety are paramount. Designed to adhere to stringent safety standards, it ensures safe operation during standard usage conditions. This unit is a robust solution for automated inspection and alignment tasks in manufacturing environments.

Technical Specifications

Laser Classification

Class 1

Model Number	6000298
Serial Number	2161
Manufacture Date	February 2001
Origin	Minneapolis, MN, USA
