Product Overview

Industrial Performance

The Class 150 WCB Swing Check Valve is engineered to effectively prevent backflow in critical piping systems. Constructed from durable WCB carbon steel, this valve is built to withstand demanding industrial environments, including water, oil, and gas services. Its design features a swing disc mechanism that ensures reliable forward flow and automatic closure for reverse flow prevention.

Technical Specifications

Pressure Class

Class 150 • Class 300

Available Sizes

- DN200
- 8 inch

Body Material

WCB Carbon Steel

Valve Type

Swing Check Valve

Key Features

Bolted Bonnet, Backflow Prevention, Swing Disc Mechanism

Suitable Media

Water, Oil, Gas
