

Class D High Power Car Audio Amplifier

This Class D amplifier delivers high power for car audio systems. It incorporates advanced thermal management and short-circuit protection.

Overview

High-Efficiency Audio Power

This Class D high-power amplifier is engineered for robust performance and efficient power delivery in demanding audio environments. Designed to minimize distortion while maximizing output, it ensures clear and powerful sound reproduction. With advanced thermal management and integrated short-circuit protection, this unit offers stable operation under varying load conditions, making it an ideal choice for high-performance car audio systems.

Technical Specifications

Amplifier Class	Class D
Model Identifier	1M1200DA

Key Features

Performance Metrics

1200 W
Rated Power

Protection Systems	Thermal Management, Short-Circuit Protection
