

Claw Hammer with Forged Steel Head

This claw hammer features a durable forged steel head for strength and longevity. The head is securely attached to a handle designed for optimal balance and control.

Product Overview

Professional Grade Claw Hammer

This claw hammer features a durable forged steel head engineered for maximum strength and longevity in demanding environments. Designed with user comfort in mind, the ergonomic handle provides optimal balance and control while effectively absorbing shock to reduce wrist and hand fatigue. It is an ideal tool for driving and removing nails across a wide range of woodworking and construction applications.

Technical Specifications

Head Material	Forged Steel
Primary Functions	Nail Driving, Nail Removal, Woodworking, Construction

Features

Key Features

- Forged steel head for high durability
- Ergonomic handle design
- Shock-absorbing construction
- Precisely shaped claw for efficient nail extraction
