

Claw Hammer with Plastic-Coated Handle

This claw hammer features a forged steel head, providing strength for driving nails and a claw for removing them. Its plastic-coated handle ensures a comfortable and secure grip, reducing vibration and fatigue during use.

Overview

Versatile Claw Hammer

The JL0215 Claw Hammer is designed for strength and durability, featuring a forged steel head ideal for both driving and removing nails. Its ergonomic plastic-coated handle provides a secure, comfortable grip while effectively reducing vibration and fatigue during prolonged use. This tool is precisely balanced to deliver powerful blows with minimal effort, making it a versatile choice for professional construction, demolition, and DIY applications.
