

Claw Hydraulic Jack

This heavy-duty claw jack is designed for lifting heavy objects with a low ground clearance. It features a robust hydraulic system for smooth and controlled lifting.

Overview

Industrial Claw Hydraulic Jack

This heavy-duty claw hydraulic jack is engineered for lifting heavy objects that require low ground clearance. Featuring a robust hydraulic system, it ensures smooth and controlled lifting performance suitable for industrial applications, machinery maintenance, and construction projects. Built with high-strength steel, the jack provides a stable base and a secure lifting point for safe operation across various capacity requirements.

Technical Specifications

Model Specifications

Model	Capacity (t)	Stroke (mm)	Collapsed Height (mm)	Extended Height (mm)	Weight (kg)
SL-5	2.5	117	228	345	8.5
SL-10	5	147	282	429	20
SL-20	10	152	310	462	31.5
SL-30	15	155	330	485	44
SL-50	25	155	370	528	88.5
