

Clean Water Pressure Booster Pump

This clean water pressure booster pump is designed for domestic water supply and pressure boosting applications. It features a robust electric motor coupled with a brass pump head and an integrated pressure control unit.

Product Overview

Clean Water Pressure Booster Pump

This versatile pumping solution is designed for efficient water management in various domestic and industrial settings. It features robust motor configurations suitable for drawing water from wells, household tap systems, and small-scale irrigation. The system is engineered to provide reliable performance for applications ranging from garden spraying to fountain operation and construction drainage.

Performance Metrics

Technical Specifications

Pump Type	Head (m)	Capacity (m3/h)	Power (kW)	Weight (kg)
Clean Water Pump	12-60	2-10	0.25-2	5-20
Submersible Pump	7-100	3-100	0.5-7.5	7.5-75

Voltage & Frequency

220V/50Hz, 220V/60Hz, 380V/50Hz, 380V/60Hz

Applications

Typical Applications

- Well water extraction
- Household tap water supply
- Construction site drainage
- Mining operations
- Garden spray and irrigation
- Fountain water circulation
