

Cleanroom Machinery Moving Modules with Air Casters

These air casters facilitate the movement of cleanroom machinery. The air casters have a capacity ranging from 10T to 48T, and customized capacities are available upon request.

Product Overview

Precision Cleanroom Mobility

These machinery moving modules utilize advanced air bearing technology to provide friction-free, effortless transport for heavy loads. Designed specifically for cleanroom environments, the system ensures maximum versatility for various equipment dimensions while maintaining floor protection. The lightweight yet durable construction is built for over a decade of reliable, low-maintenance operation.

Performance Specifications

Load Capacity Range

10 T

Minimum Capacity

48 T

Maximum Capacity

Customization

Yes

Operational Features

Ease of Operation

Simple structure requires no special training for operators.

Technology

Air Bearings, Air Casters, Friction-Free Movement

Expected Service Life

10+ years of trouble-free operation
