

Clear Dome LED Component with Leads

This clear dome LED component is designed with four metallic leads extending from its transparent base. Its clear casing ensures optimal light transmission for use in various electronic applications.

Product Overview

Clear Dome LED Component

This high-clarity dome-shaped LED component is engineered for optimal light transmission in electronic display and signaling applications. Featuring a transparent base and a robust four-lead configuration, it provides secure mounting and efficient heat dissipation. Its design is well-suited for professional-grade lighting assemblies requiring reliable, diffuse light output.

Physical Characteristics

Casing Type	Clear Dome
Lead Count	4 leads
Base Shape	Square

Application Features

Design Benefits

- Maximum light transmission
- Secure mounting interface
- Optimized heat dissipation

Primary Applications	Electronic Displays, Signaling, General Lighting
----------------------	--
