

Clear PVC Tubing

Clear PVC tubing is suitable for applications needing flexibility and visual monitoring of contents. It is made from durable PVC material, providing chemical resistance and a smooth inner surface for efficient flow.

Product Overview

Clear PVC Tubing

This clear PVC tubing is designed for versatility and reliability in low-pressure environments. It features a lightweight, flexible construction with a mirror-smooth cover that ensures efficient fluid flow and easy visual inspection. Ideal for use in machinery fittings, civil engineering projects, and aquatic animal equipment, this tubing offers a practical and cost-effective solution for fluid transfer and protective covering needs.

Physical Properties

Flexibility

Highly Flexible • Lightweight

Material

PVC

Appearance

Transparent with mirror-smooth cover

Operational Details

Common Applications

- Machinery fittings
- Civil engineering
- Aquatic animal equipment
- Fluid transfer
- Protective covering

Pressure Rating

Low pressure conditions
