

Clevis Grab Hook for Chain

Clevis grab hooks are designed for secure and efficient load handling. They feature a clevis attachment for easy connection to chains or other rigging hardware.

Overview

Professional Rigging Solution

Clevis grab hooks are essential components in rigging and lifting applications, designed for secure and efficient load handling. These hooks feature a clevis attachment, allowing for easy connection to chains or other rigging hardware using a pin or bolt. Their design ensures a firm grip on the chain, preventing slippage and maintaining load stability for critical lifting tasks.

Technical Specifications

Material	Carbon Steel, Alloy Steel
Surface Treatment	Hot Dip Galvanizing
Available Sizes	1/4" - 3/4"

Applications

Recommended Industries

Construction • Manufacturing • Material Handling • Rigging
