

Clevis Yoke End with Pin and Cotter Pin

This clevis yoke end connects to other parts using an included pin. A cotter pin secures the pin in place.

Product Overview

Industrial Clevis Yoke Assembly

This Clevis Yoke End is an essential mechanical component engineered for secure linkage in industrial textile machinery. The U-shaped design allows for versatile connectivity, while the included pin and cotter pin assembly ensures reliable retention and safety under operational conditions. Constructed from robust metal, this component provides the high durability required for heavy-duty mechanical linkages.

Technical Details

Included Components

- Clevis Yoke
- Pin
- Cotter Pin

Material

Industrial Metal

Component Type

Clevis Yoke End

Primary Application

Textile Machinery, Mechanical Linkage
