

Close-Coupled Cast Iron Centrifugal Pump

This centrifugal pump is designed for efficient fluid transfer in various industrial applications. Its robust cast iron construction ensures durability and long service life.

Overview

Robust Industrial Fluid Transfer

The Close-Coupled Cast Iron Centrifugal Pump is engineered for efficient, continuous-duty fluid transfer across diverse industrial applications. Featuring a durable cast iron construction and a TEFC (Totally Enclosed Fan Cooled) motor, this unit ensures longevity and reliability even in demanding operating environments. Its compact, directly coupled design and flanged connections facilitate secure, straightforward integration into existing piping systems.

Technical Specifications

Motor Type

TEFC • Totally Enclosed Fan Cooled

Housing Material

Cast Iron

Coupling Style

Close-Coupled

Installation & Integration

Connection Type

Flanged Suction and Discharge

Mounting

Base Mounted

Key Features

Ideal Applications

Continuous Duty, Industrial Fluid Transfer, Demanding Environments
