

# Closed-Cell Foam Insulation Tubes and Sheets

Closed-cell foam insulation provides thermal and acoustic control. It is available in tubes, sheets, and rolls for HVAC, refrigeration, and industrial applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Thermal Insulation

This flexible closed-cell foam insulation is engineered for superior thermal and acoustic performance in demanding industrial and commercial environments. Designed for applications ranging from HVAC and refrigeration to chemical and pharmaceutical infrastructure, it provides robust protection against heat loss, condensation, and corrosion. Its lightweight, anti-microbial, and fire-resistant properties ensure long-term durability and energy efficiency for complex piping and ductwork systems.

## Key Features

### Core Benefits

Heat Preservation, Noise Suppression, Moisture Proof, Fire Protection, Anti-Corrosion, Mildew Resistant, Anti-Bacterial

## Technical Performance

### Installation & Efficiency

- Lightweight construction for easier handling
- Minimal air leakage
- Fast production and installation speed
- Space-saving profile
- Approximately 20% reduction in pipeline system footprint compared to traditional methods

### System Efficiency Gain

**20 %**

Pipeline System Savings

## Applications

### Suitable Industries

Central Air Conditioning • Split Air Conditioning • Construction • Pharmaceutical • Chemical Processing • Electrical Systems
