

Closed Transfer Vehicle

This specialized utility vehicle ensures efficient and secure transport of goods or personnel. The enclosed cabin provides protection, while its compact size allows maneuverability in confined spaces.

Overview

Closed Transfer Vehicle Overview

This specialized utility vehicle is designed for the efficient and secure transport of goods and personnel. Featuring an enclosed cabin for protection from the elements and a compact, maneuverable design, it is ideal for use in industrial facilities, resorts, and urban environments. The vehicle utilizes an electric powertrain for zero-emission operation and includes a convenient hydraulic lift loading system.

Performance

Maximum Speed	25 km/h
Grade Ability	10 %
Operating Range	60 km

Dimensions & Capacity

Passenger Capacity	2
Vehicle Dimensions	4160 x 1460 x 2170 mm
Rear Cargo Dimensions	2470 x 1460 x 1350 mm

Technical Specifications

Charge Time	8-10 hours
Loading Method	Hydraulic lift
Vehicle Weight	6 kg
