Product Overview

High-Performance Dryer Motor

This high-efficiency motor is engineered specifically for clothes dryer applications, providing the necessary power for reliable and optimal drying cycles. Designed with robust construction to ensure longevity, it serves as an ideal solution for maintenance, repair, and original equipment manufacturing. We offer flexible design capabilities to meet specific customer requirements.

Technical Specifications

Rated Current

0.8 A
Current

Insulation Class

Class B

Rated Voltage

230 V

Frequency

50/60 Hz

Capacitor Requirements

6 μ F/ 450V

Wiring Color Codes

Blue, Red, Yellow
