

Clutch Booster Component

This clutch booster component is designed for automotive clutch systems. It assists in reducing the effort needed to depress the clutch pedal, providing enhanced driver comfort and control.

Product Overview

High-Performance Clutch Booster Component

This clutch booster component is engineered to assist in reducing the physical effort required to depress the clutch pedal, significantly enhancing driver comfort and vehicle control. Designed for reliability and durability, it meets or exceeds original equipment specifications for automotive clutch systems. It serves as an essential replacement part for heavy-duty vehicle applications, ensuring smooth and consistent operation.

Technical Specifications

Bore Size	102 mm
Part Number	9700511240

Compatibility

Compatible Brands	DAF, Renault VI
Application	Truck
