

Clutch Cover for Manual Transmissions

This clutch cover is a critical component in a vehicle's manual transmission. It applies pressure to the clutch disc, facilitating the transfer of engine power to the transmission.

Product Overview

High-Performance Clutch Cover

This clutch cover is a critical component designed for manual transmission systems, engineered to facilitate the efficient transfer of engine power to the transmission. Constructed from durable, high-strength materials, it is built to withstand significant mechanical stress and high operating temperatures. Its integrated spring and lever mechanism ensures smooth, consistent clutch engagement and disengagement for reliable vehicle operation.

Technical Specifications

Application

Manual Transmission

Design Features

- High-temperature resistance
- Durable construction
- Precision spring and lever system
- Secure flywheel mounting points

Part Number

TYC522

OEM Reference

16284-06040
